

My First French Tools In The Shed Picture With English Translations

Moving to a new country can be a daunting experience, especially when it comes to understanding the local language. This can be particularly true when it comes to practical tasks such as working in the shed. In this article, I will provide a detailed overview of the basic tools found in a French shed, including their names, functions, and English translations.

My First French Tools in the Shed Picture Book with English Translations: Bilingual Early Learning & Easy Teaching French Books for Kids (Teach & Learn ... words for Children t. 5) (French Edition) by Chloe S.

Workbench Tools

The workbench is the heart of any shed, and it is where most of the work will be done. The following tools are essential for any workbench:

- **Établi** (Workbench) - The workbench is a sturdy table that provides a stable surface for working on. It is typically made of wood or metal and

has a variety of features, such as drawers for storage and a vise for holding workpieces.

- **Scie égoïne** (Handsaw) - A handsaw is a tool used for cutting wood. It consists of a blade with teeth on one edge and a handle on the other. Handsaws come in a variety of sizes and shapes, depending on the type of wood being cut.
- **Marteau** (Hammer) - A hammer is a tool used for driving nails and other fasteners. It consists of a heavy head and a handle. Hammers come in a variety of sizes and weights, depending on the type of work being done.
- **Tournevis** (Screwdriver) - A screwdriver is a tool used for driving screws. It consists of a blade with a slotted or Phillips head and a handle. Screwdrivers come in a variety of sizes and shapes, depending on the type of screw being driven.
- **Clé à molette** (Adjustable wrench) - An adjustable wrench is a tool used for tightening and loosening nuts and bolts. It consists of two jaws that can be adjusted to fit different sizes of nuts and bolts.

Hand Tools

In addition to the workbench tools, there are a number of other hand tools that are commonly found in a French shed. These tools include:

- **Clé Allen** (Allen wrench) - An Allen wrench is a tool used for tightening and loosening screws with hexagonal heads. It consists of a hexagonal shaft with a handle on one end.
- **Clé plate** (Wrench) - A wrench is a tool used for tightening and loosening nuts and bolts. It consists of two jaws that are fixed at a

specific distance apart.

- **Pince** (Pliers) - Pliers are a tool used for gripping and cutting objects. They come in a variety of shapes and sizes, depending on the type of work being done.
- **Ciseaux** (Scissors) - Scissors are a tool used for cutting paper, fabric, and other materials. They consist of two blades that are joined together at a pivot point.
- **Mètre ruban** (Tape measure) - A tape measure is a tool used for measuring distances. It consists of a flexible tape with markings indicating the distance in meters and centimeters.

Power Tools

In addition to hand tools, there are also a number of power tools that can be found in a French shed. These tools include:

- **Perceuse** (Drill) - A drill is a tool used for making holes in wood, metal, and other materials. It consists of a motor that drives a rotating bit.
- **Meuleuse** (Grinder) - A grinder is a tool used for grinding and shaping metal and other materials. It consists of a motor that drives a rotating abrasive wheel.
- **Scie sauteuse** (Jigsaw) - A jigsaw is a tool used for cutting curves and irregular shapes in wood and other materials. It consists of a motor that drives a reciprocating blade.
- **Raboteuse** (Planer) - A planer is a tool used for smoothing the surface of wood. It consists of a motor that drives a rotating cutter head.

- **Tour à bois** (Lathe) - A lathe is a tool used for shaping wood and other materials. It consists of a motor that drives a rotating workpiece.

Garden Tools

In addition to the tools listed above, there are also a number of garden tools that are commonly found in a French shed. These tools include:

- **Bêche** (Spade) - A spade is a tool used for digging and moving soil. It consists of a flat blade with a pointed tip and a long handle.
- **Fourche** (Fork) - A fork is a tool used for digging and moving soil. It consists of a flat blade with several tines and a long handle.
- **Râteau** (Rake) - A rake is a tool used for smoothing the surface of soil and removing debris. It consists of a long handle with a head with several teeth.
- **Brouette** (Wheelbarrow) - A wheelbarrow is a tool used for transporting soil, mulch, and other materials. It consists of a large bucket with a wheel on one end and two handles on the other.
- **Sécateur** (Pruning shears) - Pruning shears are a tool used for cutting branches and stems. They consist of two blades that are joined together at a pivot point.

The tools listed above are just a few of the many that can be found in a French shed. Understanding the names and functions of these tools is essential for any English-speaker who wants to work effectively in a French shed. By taking the time to learn about these tools, you can avoid confusion and frustration and get the job done right.
